I am trying to get the next div with the next class. Each div is a group of input fields with the class name input. There is a class before the last div called "next-group" but I can't find out how to make the script find this. I've looked into.next() and.nextAll() but I can't get it to work. Here is my code: `S('input').change(function() { if (S(this).attr('id') === 'invoice-add-line') { S('input').not(this).each(function(i, v) { i += 1; S('line' + i).text(S(this).val()); }); } else { if (S(this).val() != "") { S('input').not(this).each(function(i, v) { i += 1; S('line' + i).text(S(this).val)`
